

# John Holdun

Software engineer, web architect, and experience designer in Los Angeles.

[john@johnholdun.com](mailto:john@johnholdun.com)

## Postlight

Principal Software Engineer • April 2018 – Present

Designing and building APIs and websites. (Node, PostgreSQL, React, Wordpress, Vue, Django, Tailwind, Next.js, Serverless, Netlify, AWS...you get it)

## Getaway

Interim Head of Engineering • October 2019 – April 2020 (Fractional)

Maintained and improved internal tools and processes. (Rails, React)

## Namely

Senior Software Engineer • September 2016 – April 2018

Designed and introduced new backend microservices and frontend apps extracted from existing monolith. (Rails, GRPC, React, Redux)

## Rent the Runway

Senior Software Engineer • April 2014 – August 2016

Established best practices on a team with diverse levels of experience: TDD, MVC, and a distributed, RESTful architecture for a large ecommerce web app. (Sinatra, React, Redux)

## Fohr

Lead Developer • January 2013 – January 2014

Developed rapid, stable iterations on a closed product with millions of searchable, sortable records for high-profile clients in the luxury fashion space. (Rails, Elasticsearch)

## Umagram

Cofounder & Developer • April 2010 – November 2013

Designed and developed many interrelated social media projects. (Rails, Twitter API)

## About.com

Web Developer • April 2010 – October 2010

Developed high-traffic, extremely cross-browser HTML/CSS for new template designs.

---

I've been developing for the web, professionally and otherwise, since 1999; details on older experience is available upon request. Thanks! Bye!
