

John Holdun

Software engineer, web architect, and experience designer in Brooklyn, New York.

john@johnholdun.com • 646 712 3587

Postlight

Lead Software Engineer • April 2018 – Present

Designing and building APIs and websites. (Node, Serverless, Postgresql, and more)

Namely

Senior Software Engineer • September 2016 – April 2018

Designing and introducing new backend microservices and frontend apps extracted from existing monolith. (Rails, GRPC, React, Redux)

Rent the Runway

Senior Software Engineer • April 2014 – August 2016

Established best practices on a team with diverse levels of experience: TDD, MVC, and a distributed, RESTful architecture for a large ecommerce web app. (Sinatra, React, Redux)

Fohr Card

Lead Developer • January 2013 – January 2014

Developed rapid, stable iterations on a closed product with millions of searchable, sortable records for high-profile clients in the luxury fashion space. (Rails, Elasticsearch)

Umagram

Cofounder & Developer • April 2010 – November 2013

Designed and developed many interrelated social media projects. (Rails, Twitter API)

About.com

Web Developer • April 2010 – October 2010

Developed high-traffic, extremely cross-browser HTML/CSS for new template designs.

I've been developing for the web professionally since 2008; details on older experience is available upon request.
